Profile

Experience Software Tester with outstanding testing skills, working as part of a team performing the manual and automated testing process on software applications to make sure that all errors are detected and corrected before release to clients. I have analytical skills and experience of writing test cases, test scripts and execution of test scripts throughout the life cycle of a project.

I am an efficient team player aspiring to reach a credible height in my chosen field with a well-structured organization through hard work, dedication, teamwork, honesty, and sincerity of purpose and provides adequate room for learning new skills upon experience and personal development.

Professional summary

- 2years experience on testing Web-based and Mobile Applications
- Good understanding of Software Development Life Cycle (SDLC), Software Testing Life Cycle (STLC) and methods like Waterfall and Agile.
- Experience in implementing Test Scenarios into Test Cases, Test Script
- Good knowledge of testing and defect management tools – Jira, Confluence, Zephyr, and Excel.
- Experience of working in Agile SCRUM environment.
- Understanding of different categories of testing like Black Box Testing (Boundary value analysis, Error guessing, State Transition Testing), exploratory testing, Smoke Testing, Sanity Testing, End-To-End Testing, Regression Testing and User Acceptance Testing (UAT)
- Good knowledge and understanding framework e.g. Test Driven Development Framework (JUnit and TestNG), Behaviour Driven Development (Cucumber JVM) and Data-Driven Framework
- Good understanding using Apache POI, Apache Maven
- Good experience on Parallel Testing and Cross Browser Testing using TestNG
- Knowledge of Java Programming Language for Selenium Webdriver Automation
- Good understanding of web technologies such as HTML, CSS, JavaScript etc.
- Microsoft office suite – MS Word, Excel, PowerPoint, and Ms Outlook, Ms Project
- Execution of test suites and HTML report generation using TestNG
- Exposure to application database - Microsoft SQL Server, MySQL
- Ability to work independently and also perform as part of a team.

Professional Experience

Adit Consulting

May 2018–Till Date

SOFTWARE TESTING

Adit Consulting is software Development Company located in KENT, UK. The main purpose of the project is to implement the Ecommerce websites for our client both in the UK and Oversea. The application is available both on the web and device e.g. mobile, tablet.

Responsibilities
